FOR IMMEDIATE RELEASE

BERKHEIMER OUTSOURCING SUCCESSFULLY CONCLUDES TYPE II SAS 70 AUDIT
Recognized by Independent Auditor for Sixth Consecutive Year

BETHLEHEM, PA November 27, 2007 – Berkheimer Outsourcing, Inc. announced today they have successfully completed the Statement on Auditing Standards (SAS) 70 (Type II) Audit for the sixth consecutive year.

The SAS 70 Audit is one of the highest industry-accepted auditing standards evaluations for service companies, developed by the American Institute of Certified Public Accounts (AICPA). The report validates that a service organization has been through an in-depth audit of their internal and information technology control objectives and processes.

“It is imperative that our clients have an assurance and trust that their data is safe and that the security policies and operating procedures can be relied on. Successfully completing this audit six years in a row is a testament to the hard work and more importantly, successful process controls and design that we are committed to.” said Thomas Tripodi, Director of Sales and Marketing for Berkheimer, “By undergoing the SAS 70 audit, Berkheimer Outsourcing can provide our clients with a comprehensive audit report that facilitates compliance with their own corporate governance in addition to Federal regulations.”

With Federal regulations such as Sarbanes-Oxley and the Health Insurance Portability and Accountability Act (HIPAA), companies have come under increased scrutiny for their internal controls for handling, hosting and processing customer data. The SAS 70 audit provides Berkheimer's clients with the necessary audit reports and provides a reasonable assurance that the designed control objectives were complied with and can be relied upon.
